

Here's how you can produce series of CDs/DVDs with the Epson Discproducer PP-100N Security

1: Deactivate local CD/DVD burners

Since your data can be sent via your LAN, you can deactivate the CD/DVD burners on local computers. This prevents the burning of data to optical media.

2: Set up the job

Users can set up a job by selecting the data to be burned and the number of copies to be printed. The data is stored on the hard drive of the Epson Discproducer PP-100N Security.

3: Authorisation

Users may also be required to obtain a release from an approver before they can proceed with the production process.

The disc producer PP-100N Security decodes the data and launches the production process.

4: Production

On completion of the burn and print process, the disc producer produces the discs. The discs are produced with the custom parameters defined by the users. With Epson recommended media they will obtain a high-quality printout that is both smudge-proof and water-resistant.

5: Allocation of the media

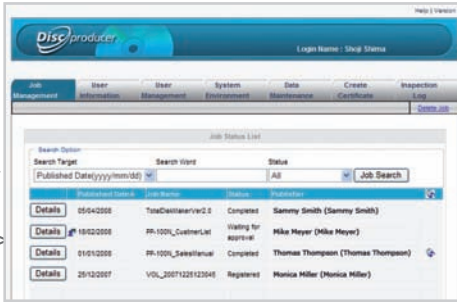

On completion of the burn and print process, the disc producer allocates the media to the corresponding user. A status report informs the user when the production process has been completed.

6: Identification

The PP-100N Security restricts the user's access to the media based on their PIN number and will deny him access to the media of other users. Once the users have entered their PIN number, the robot arm places the corresponding media in the output drawer.

7: Output of the media

The disc producer outputs the discs from the drawer.

TECHNICAL SPECIFICATIONS

LCD:	0.9" (22.9 mm) TFT Color LCD
LEDs:	7 LEDs (Red, Green, Blue, Yellow, Cyan, Magenta, White)
Buttons:	12 buttons (Power, Stop, Start, Previous, Next, Home, Back, Forward, Eject, Help, OK, Cancel)
Security Lock:	Yes (Physical lock on the front panel)
Ethernet IF:	Yes (Standard Ethernet port)
Internal Logic:	Yes (Built-in logic for data processing)
PIN-Pad:	Yes (4-digit PIN input)
Supported OS:	Windows XP, Windows Vista, Windows 7, Windows 8, Windows 10, macOS, Linux
Size/Weight:	200 mm (W) x 150 mm (D) x 100 mm (H) / 2.5 kg
